

1971 Mini Cooper S MK3

YEAR	DRIVE SIDE	MILEAGE	PRICE
1971	Right	30,000	£34,990

This absolutely stunning Mini Cooper S MK3 left the assembly line at Longbridge on the 2 June 1971 and is 1 of only 792 manufactured for the British market.

Looking completely "of the era" in timeless and unmolested Glazier White with Dark Blue interior it was the subject of a complete, body off restoration just a couple of years ago and has had very little use since. The interior has been totally re-trimmed to original specification including new carpets.

It also has the original engine with a 'Downton' cylinder head, one of many produced for 'special tuning' as part of their tuning kits as well as original chassis plates.

With MOT certificate until July 2008, it comes complete with a very extensive history folder including all old invoices/MOT's and a Heritage Certificate.

This must be one of the most desirable Minis on the road today and it's sure to generate a great deal of interest.

Contact a member of our sales team and arrange a viewing today to avoid disappointment.
